TO: Minerals File

FROM: Lynn Kunzler, Senior Reclamation Specialist 

RE: Site Inspection, James Peterson, Henrietta #21, S/003/029, Box Elder County, Utah

Date of Inspection: August 22, 2001
Time of Inspection: 2:00 p.m.
Conditions: Clear, warm
Participants: Lynn Kunzler, DOGM

Purpose of Inspection: Document site conditions while in the area.

I had received allegations that there has been a lot of activity at this site in recent weeks, including blasting and double-trailer trucks loaded with stone leaving this site, and that this site was possibly over five acres in size. With these allegations, I inspected the site. Since my last inspection during the 2000 field season, the only change observed was two small (less than 0.1 acres) test pits near the north boundary of Mr. Peterson's claim. It did not appear that much, if any, stone had been removed from the south pit area since the last inspection. This site is still well within the limits of a small mining operation. It was determined that the allegations are unfounded.

Several photos were taken to document site conditions.
